

Day 2 — Data Analyst Placement Exam Report

Polished source-based report | Foundation & Diagnostic

PERSONAL SCORE	SUBMISSION DATA
Not available	The uploaded HTML contains the exam/report engine and answer key, but no saved user answer state.

1. Exam Configuration

Item	Source value
Questions	32
Sections	8
Duration	60 minutes
Scoring	1 mark per question
Negative marking	None
Navigation	Free navigation
Review	Mark for Review
Auto-submit	At 00:00

2. Section Blueprint

Section	Qns	Focus
SQL	3	Aggregation, GROUP BY, HAVING, COUNT(*)
Python	1	Dictionary frequency counting
Ratio	3	Ratios, unit rate, combined ratios
DI	3	Bar-graph reading and arithmetic
Sentence Correction	4	Agreement, neither/nor, for/since
Blood Relations	5	Family-chain reasoning
Psychometric	10	Logic, arithmetic, sequences, decisions
Reading Comprehension	3	Main idea, detail and metric definitions

3. Answer Key & Learning Notes

Q1 · SQL — Correct answer: **A**

GROUP BY department groups rows so AVG(salary) is computed per department.

Q2 · SQL — Correct answer: **B**

HAVING filters aggregated values; WHERE operates before aggregation.

Q3 · SQL — Correct answer: **B**

COUNT(*) counts every row in each group.

Q4 · Python — Correct answer: **C**

4 occurs three times in the array.

Q5 · Ratio — Correct answer: **C**

2:3 gives 5 parts; $50/5=10$, so $B=30$.

Q6 · Ratio — Correct answer: **C**

$150/5=30$ per notebook; $8 \times 30=240$.

Q7 · Ratio — Correct answer: **B**

Scale 4:5 to 8:10; $A:C=8:3$.

Q8 · DI — Correct answer: **D**

210 is the largest value.

Q9 · DI — Correct answer: **C**

$210-120=90$.

Q10 · DI — Correct answer: **C**

$(120+180+150+210)/4=165$.

Q11 · Sentence Correction — Correct answer: **B**

Each is singular, so 'has completed' is correct.

Q12 · Sentence Correction — Correct answer: **B**

The intended singular collective-noun construction is 'The team is working.'

Q13 · Sentence Correction — Correct answer: **C**

The nearer subject is employees (plural), so 'were' is correct.

Q14 · Sentence Correction — Correct answer: **C**

For is used with a duration: 'for two years.'

Q15 · Blood Relations — Correct answer: **A**

A is male and a sibling of B/C, so A is C's brother.

Q16 · Blood Relations — Correct answer: **B**

P is Q's mother and Q is R's father, so P is R's grandmother.

Q17 · Blood Relations — Correct answer: **C**

Z is X's grandparent.

Q18 · Blood Relations — Correct answer: **B**

M is O's aunt.

Q19 · Blood Relations — Correct answer: **B**

A is D's grandfather.

Q20 · Psychometric — Correct answer: **C**

Each term doubles: $24 \times 2=48$.

Q21 · Psychometric — Correct answer: **A**

Managers are employees; Ravi is a manager.

Q22 · Psychometric — Correct answer: **C**

Check definitions, filters and time period first.

Q23 · Psychometric — Correct answer: **D**

16, 24 and 32 are divisible by 8; 45 is not.

Q24 · Psychometric — Correct answer: **C**

$B+A+D=2+1+4=7$.

Q25 · Psychometric — Correct answer: **B**

600 seconds/30=20 seconds per question.

Q26 · Psychometric — Correct answer: **C**

20% of 150=30.

Q27 · Psychometric — Correct answer: **A**

AZ, BY, CX → DW.

Q28 · Psychometric — Correct answer: **B**

$10 \bmod 7=3$; Wednesday + 3 = Saturday.

Q29 · Psychometric — Correct answer: **C**

Time-box the question and return later if possible.

Q30 · Reading Comprehension — Correct answer: **B**

Choose and define metrics around the business question.

Q31 · Reading Comprehension — Correct answer: **B**

Average can hide differences between customers or products.

Q32 · Reading Comprehension — Correct answer: **C**

Different definitions, periods or populations can produce different numbers.

4. Performance Fields

Metric	Actual result
