

Day 1 — Data Analyst Placement Test Report

Foundation & Diagnostic | Test configuration and available report status

1. Test Overview

The uploaded Day 1 Diagnostic Console is a 32-question placement diagnostic with a 53-minute overall clock. It follows the Day 1 foundation topics from the 100-Day Data Analyst Placement Prep syllabus.

Section	Questions	Suggested Time
SQL	3	10 min
Python	1	5 min
Number System	3	7 min
Data Interpretation — Table	3	8 min
Error Spotting	4	6 min
Coding-Decoding	5	8 min
Psychometric	10	2 min hard limit
Reading Comprehension	3	7 min
TOTAL	32	53 min

2. Day 1 Diagnostic Areas

Area	Day 1 focus
SQL	SELECT / WHERE / ORDER BY basics
Python	Variables, loops, conditionals
Numeric	Number System
Aptitude / DI	Tables / data interpretation
Verbal	Error Spotting
Reasoning	Coding-Decoding
Psychometric	Numerical, logical, pattern and situational judgement
RC	Short analytics/business-oriented passage

3. Score Status

Score: Not available from the uploaded file.

The uploaded HTML contains the question bank, correct-answer key, scoring logic, and report-generation code, but it does not contain the user's submitted answer array or the final generated score. Therefore, a numerical score or section-wise performance has not been invented in this report.

4. What the Test Report Is Designed to Measure

The test calculates total correct answers and section-wise accuracy. Its built-in classification is: **Strong** at 80% or above, **Developing** from 50% to 79%, and **Needs Work** below 50%. The report also generates weakest-area recommendations and question-by-question answer review.

5. Diagnostic Interpretation

Day 1 is intended as a baseline rather than a final placement judgment. The purpose is to identify which foundation areas require more practice before moving deeper into the 100-day plan. The official syllabus places Days 1–25 in the Foundation & Diagnostic phase.

6. Next Step

To generate a true personal score report, the submitted-result page or exported result containing your answers is required. Once that result is available, the report can include your exact score, section-wise accuracy, weakest topics, and Day 2 priorities.
